The Messew Scient are a good hockey team, they can state, they can aboot and their passing is out of this world. And they left the impression in Kingsion has night that they could hit, too, if the occasion areas.

As we said if the start if this column, the Selects are a good hockey cinh, but we would like to see them play under Canadian rules. It is our opinion, however, that the Whithy Dupleps or the Belleville McFariands would defeat the Selects by three goals, under any rules.

Whility Dunlops are scoring goals at the highest rate in the Eastern Senior "A" league and Corawall Chevies are allowing sools against them at the highest rate. Statistics prove II.

Not only are the Dunnies leading in goots "for" aver-age but they also have the best "against" mark. Here's the dope from which this enlightening information is derived.

Runner-up Belleville McFarlands have wen ulne lost five and tied one of 15 centrels for III points. They have soored III goals or an average of 4.65 per game white Gordio Bell has been beaten 49 times for a 3.37

The third place Pembroke Lumber Kings have the low-sister" average per game of any of the loop's six elubs. You Kang have played 12 kauner, won seven, lost eight, the twa, good for 18 points. They have scored but 50 goals, or an average of 2.94 a game. The opposition has beaten John Craig on 81 occasions for a 3.54 "against" average.

The firing a la came as no surprise to others around the league, expectify since Joe has not been playing good backey. But then in the games we have seen Blagkey play he has not played up to par either and the added responsibility of coaching may not help that situation.

We would live to give my try may that situation.

We would give to give where the tresubt is on the Cornwall clith. Ascerding in the Cornwall active nonthe first of the part, the defence was at fants. The
Frederick was not coming through with the class of

the formaries only go see may.

One can't Judge a club on a couple of games and that it all we have seen the Chevies play. However in the two games here, won by the Macs by 5-3 and 3-1 scores, Frederick and the defence seemed to be at fault.

The McFartands had little trouble getting through the defence and when they did Frederick peech no problem. On the other hand when the Mans lost in Cornwall by a 6-2 acore the defence and gualiz were sold to in the Chevicus biggest assets.

The records show that the Chevies are a high scoring outift but defensively the story is different, they having 62 sunis scored against them in 17 games.

Blagleys as been out with an injury for the past week to no may make his coaching debut from the bench toolghit Comwall would hive nothing better than to start a long winning streak against the McParlands, their arch rivals, so the new coach will have his matter fired up for this one or we miss our guess.

The holder of shares is a company becomes a part owner of the company... he shares in profest brough dividends and is the company growth through ownership. When share gifts are made to young people, they get these material benefits plus a better understanding of the possible rewards of thrift, and of participation in Canadian enterprise.

And for two periods they seemed to be wall on their chieve their objectives.

Then it happened! Any vindenties that was done, exploted in the Otiaws faces in that furtions third period Whitip explotes that sure the Dunnies sweep to their full potential, shale the ambitious youngstors from Otiaws into the ice and rum home five unanswered quite to icke a 10-5 violety.

Ceach Puisr Jones in slowly, but purely, developing his Lombert-Ballins Junier "B" shih hale a fighting hard-shooting crew that is beginning to make itself fel-in league circles.

The Jones' youngsters defented the strong Kings in twice in as mady nights last week and have fought to into third place in the loop standing.

It is unfortunate they are not getting the ben'toffice as t they deserve as is usually the case in a centre who for "A" and juster "B" teams operate.

A Message for the Season by

Of course, they know Christmas as Sante Claus and gifts gaily wrapped in colour and ribbon.

And Christmas is a tree glimmering with lights — and carols sung by neighbors in a snowy silence.

'And Christmas in a warmth between old friends — when even strangers ned sky greatings on the street.

But, remind them that Christmas is His day, the Birthday of a King, who makes all things possible.

Tell them that Christmas reflects

tell These with Joy and Wonder and
Faith that is in the glow of
thiden's yess — like the yes of
those who beheld in awasame thanks
the new-born Child in the Menger.

Tell them the Truth about Christmas that they can sing His praises knowing He is with us during this Season and Eternally.

The Funbrehs Lumber Kings, rebounding from (see defeats and a tie in a three-game series with the McFariands, again accorded their "Indian Kigs" here on the White's Dunleys, defeating them 4-5 fee their second glraight victory over the Allan Cup champions.

The other night when they fell 5-2 before the Macs. Kings looked anything but a team that could make the gally Dunnies ary "uncie." And that's not detracting from tine all-round performance of like's crew.

Sewerce, that is water under the bridge and tought is another night. A vengeful crew of Dunleys, breet by peallooping treables, will be here if do bettle with the Mace in what should be the senior loust of the seniou.

The last time the teams clashed here the McFarlands "up" for the fray. They came up with an opitianding thillion of Senior A hockey "as she should be played" and allely gave the champlons a next lesson in the art of puck-sing. The score was 4-1.

Although they defeated the Mann 7-3 in their last game in Whithy, Wren Blahr and his Dennies are fully warre of the potential of the McFarlands. They have a wholecome respect for the second-pince puchater from the hanks of the Moler, and will, no death. Task their full power at the Belleville cisk, which with a victory can climb to within four points of the lorege-leveling Dunniets.

Three, ioe, fandam will get its first alimpte its action of the player who gave up being the little free in the hig post to bost-load in the little lake, one Sié Smith, with without benefits of previous master experience filled the playing-cosch vacancy of the Dunlaps.

Mr. Smith has been flashing goal-scoring ability in his two or three times out and will bear watching in to-ally tustle. The former Teronto Maple Leaf scored the is against Kingston and netted the winner in a recent

Meet Timothy, life of the party!

Quite a guy, Tim. Tall, handsome, everyhody liked him, Tim was the life of any party. Take Christman They were all there ild Archie house. It had been quite an evening. The party linally heake up around 2.30. "See you all at our place, tomorrow", called Tim. But tomorrow as the mistake of having one more far the road, Oh, sure, he felt olay, However, he wann't olay. Alcohol had dulled his reflexes and changed his attitude taward driving. Shirley realized it the moment she saw the car pull out of the side and, right in front of them. At any other time, Time could have a voiceled an other time. The could have a voiceled and other times of the distinction of the distinctio

situation. Atterwards, their friengs-tried to figure it out. How could Tim and Shirley be dead, he didn't, have too much to drink. He was clay, benides, Tim was such a good driver. They were right. Tim didn't was such a good driver. They were right. Tim didn't have the such that they didn't realise was that a few ounces of alcohol hed slowed up his relieves, impaired his shilling and changed his driving attitude. The Ontario Department of Transport asks you not to take that chance. You can lose out, so easily, just as Timothy and his wife did. If you intend drinking, don't drive. You'll have an easy conscience . . . and a lot more

Together for Christmas

Christmas Day-the most joyful day of the year. In the proud cities, the humble villages, the streets are strangely quiet. For on this day the clamour of enterprise and industry is stilled. The streets are quiet, yet in the homes the sir-is charged with excitement. Ribbon and gay wrapping paper are strewn around the tinsel-sparkling

tree . . . flush-cheeked children display their treasures once again...and in the background the table decorations proclaim more joys to come. In the churches, too, there is that same excitement. Voices are raised in eager jubilation . . . for this is the joyful day - the day when all men and women of goodwill are together for Christmas.

Through Inco Research lower grade ores are mined economically

At Creighton Mine near Sudbury a large body of lower grade ore was known to exist. It promised to be an important source of nickel and copper—if it could be mined economi-cally. But how to get this ore out at a cost enough to be commercially practical?

Intensive study went into the problem, Underground tests were made. Observing that the earth above the mined-out orebodies had begun to settle, Inco mining engineers suggested the possibility of mining the lower grade ore by induced actiling. Ore would be cut away from the underside of the orchosy. As the support for the ore and rock above was removed, the mass would begin to settle causing the ore to break up so that it could be drawn off and recovered. The idea sounded good.

Scale models were built m determine how the ore could in drawn off from below without getting the waste rock above the ore. Then the method was tried in the mine. The results were so promising that regular mining operations were begun. Today, Creighton Mipe is producing 12,000 tons of this lower grade ore daily. And Inco Research did it!

\$30,000 worth of Canadian mink, considered by many the finest in the world. Canada's mink market has grown tremendously in thin, past decade in response to ever in-creasing demand for the luxurious fur.

Canadian models arrive in Paris for an exhibition of fur fashions. Canadian mink has been widely used on con-tumes created by many of the world's top couttriers. National Film Board of Canada Photos by Jein Gunfort Merri

Hundreds of operations, many of them manual, go into the making of a mink coat. Here, mass production is un-heard of, for each garment is a paintrakingly individual profess. A full length mink coat requires from 65-85

skins. Some 10 miles of thread are used in stitching the carefully matched "let-out" skins together. The pattern is first blocked out by veteran craftsmen who use about 12,000 brass pins in the process.

Canadian exposs of mink has risen from II million in 1945 to \$17 million in 1946. The U.S. and U.K. are biggest purchasers. Skins are carefully deide before shipment so fur auctions in Montreal, Winnipag and Vancouver.
